Core Competencies

Tino LLC is a digital transformation and UX/UI design provider that delivers quality solutions for compliance-driven agencies. We serve various industries with a focus on creating intuitive, user-friendly, and accessible digital experiences for everyone.

- **UX/UI Design & Accessibility:** Translating dense policies and workflows into clear, ADA/WCAG 2.2-compliant user journeys that serve diverse populations, from students and families to veterans and field personnel.
- **Data Visualization & Dashboards:** Reimagining complex analytics, including Tableau, Power BI, and custom solutions, into actionable, secure, and role-based interfaces for internal teams and public stakeholders.
- **CRM & Systems Integration:** Connecting modern interfaces to existing agency infrastructure through integrating CRMs, third-party services, and legacy systems into unified, role-based experiences that work for staff and the public alike.
- **High-Volume Web & Mobile Portals:** Full-cycle design and engineering of scalable public-facing applications built to handle high traffic, protect sensitive data, and maintain absolute public trust.

Differentiators

- **User-Centered UX**: We utilize behavioral science to architect interfaces that increase task completion rates, reduce administrative support burdens, and build institutional trust across high-stakes journeys.
- **Compliance & Security First**: Proven success delivering solutions that meet strict HIPAA, ADA, Section 508, WCAG 2.2 and enterprise security standards without sacrificing design excellence.
- **Agile Modernization:** We specialize in delivering rapid, tangible value within focused engagements, seamlessly integrating with long-term strategic modernization goals.
- **Cross-Industry Excellence:** Bringing commercial-grade digital aesthetics and performance, proven with global brands like Toyota, Ford, and Nickelodeon, to vital public and enterprise services.

Performance Examples

Port of Houston Partners in Maritime Education | Nonprofit / Public Sector
Engineered a multi-program operations platform serving students, parents, academic and industry partners, with integrated Neon One CRM, scholarship portal, and role-based onboarding flows.
Scope: 3,400 hours over 9 months | **Impact**: Public-facing site, scholarship & partner portals, full-cycle delivery.

Sparrow Labs | Student Loan Search Engine | Finance
Engineered a comprehensive B2C web/mobile application and secure B2B lender portal, managing massive data scale with intuitive navigation for millions of users.
Scope: 11,000 hours over 2 years | **Impact**: B2C app, B2B portal, full-cycle delivery.
